Contributor Test Plan — TP2

Lessons Learned System · Owner: Pablo Pelaez Fundora · Draft, 2026-10-24

Purpose and Scope

This plan lists the semi-automated and manual tests used to show that the Contributor (Phase Two) user stories are satisfied by the LessonsLearned and LessonsLearnedList classes, the matching Database methods, and the Contributor GUI. Stories are numbered C1–C4 in the order they appear in the Lessons Learned System V1 user stories document. Requirement IDs R1–R14 are drafts and will be renamed to match the team's Task 6 requirements list.

How to read the table: Positive tests use valid input and should succeed. Negative tests use bad input and should be rejected. Automated tests run in ContributorTestbed; manual tests are done by hand through the GUI. Tests marked **Expected to fail** target a known bug in the current code and should pass once it is fixed.

Requirements

ID	Requirement	Source
R1	Contributor can create a lesson with core information	C1
R2	Core fields are validated against their limits	C1, validate()
R3	Lessons persist in the database across restarts	Task 3
R4	Contributor can update their lesson	C1
R5	Contributor can't change locked fields, and the GUI shows locked fields	C1, C2
R6	Contributor can delete their own unlocked lesson	C1
R7	A locked lesson, or one with any locked field, can't be deleted	C2
R8	Contributor sees a list of their own lessons	C2
R9	Contributor can select a lesson from the list to examine it	C2
R10	Contributor can add experience (time and effort) info	C3
R11	Contributor can't see other contributors' lessons	C4
R12	Effort info is hidden from the contributor when effortVisible is false	C1, curator epics
R13	Contributor sees the curator-edited version of their lesson	C4
R14	The lesson list supports listing all lessons and keyword search	Task 3

Test Cases

Test	Req.	What we do	What should happen	Type	How	Status
TC-C01	R1	Create a lesson with a title, description, and author filled in.	The lesson is saved and gets an ID number.	Positive	Automated	Not run yet
TC-C02	R1	Create a lesson with the title left blank.	The lesson is rejected and nothing is saved.	Negative	Automated	Not run yet
TC-C03	R1	Create a lesson whose title is only spaces.	The spaces are trimmed, so it counts as blank and is rejected.	Negative	Automated	Not run yet
TC-C04	R1	Create a lesson with the description left blank.	The lesson is rejected.	Negative	Automated	Not run yet
TC-C05	R1	Create a lesson with no author.	The lesson is rejected.	Negative	Automated	Not run yet
TC-C06	R2	Fill every field to its exact maximum length (title 100, description 2000, root cause 2000, recommendation 2000, keywords 1000, category 100).	The lesson is accepted.	Positive	Automated	Not run yet
TC-C07	R2	Enter a title one character too long (101).	The lesson is rejected with a message about the title length.	Negative	Automated	Not run yet
TC-C08	R2	Enter a description one character too long (2001).	The lesson is rejected.	Negative	Automated	Not run yet
TC-C09	R2	Enter a root cause one character too long (2001).	The lesson is rejected.	Negative	Automated	Not run yet
TC-C10	R2	Enter a recommendation one character too long (2001).	The lesson is rejected.	Negative	Automated	Not run yet
TC-C11	R2	Enter keywords one character too long (1001).	The lesson is rejected.	Negative	Automated	Not run yet
TC-C12	R2	Enter a category one character too long (101).	The lesson is rejected.	Negative	Automated	Not run yet
TC-C13	R3	Save a lesson, close the database, open it again, and read the lesson back.	Every field comes back the same, including the locks and the effort visibility setting.	Positive	Automated	Not run yet
TC-C14	R3	Ask for a lesson ID that doesn't exist.	Nothing is returned and the program doesn't crash.	Negative	Automated	Not run yet
TC-C15	R4	Change a lesson's description and save it.	The new description is saved.	Positive	Automated	Not run yet
TC-C16	R4	Change a lesson's title to blank and save it.	The change is rejected and the old title stays.	Negative	Automated	Not run yet
TC-C17	R4	Try to update a lesson that was never saved.	The update is rejected.	Negative	Automated	Not run yet
TC-C18	R5	Lock the title, then have the contributor change it.	The change is rejected and the title stays the same.	Negative	Automated	**Expected to fail**

Test	Req.	What we do	What should happen	Type	How	Status
TC-C19	R5	Lock the title, then have the contributor change the description.	The description change is allowed.	Positive	Automated	Not run yet
TC-C20	R5	Open a lesson with a locked title on the contributor screen.	The title box can't be edited and is marked as locked.	Positive	Manual	Not run yet
TC-C21	R6	Delete an unlocked lesson.	The lesson is gone and can't be read back.	Positive	Automated	Not run yet
TC-C22	R6	Delete a lesson that doesn't exist.	Nothing is deleted and no error crashes the program.	Negative	Automated	Not run yet
TC-C23	R6	Click Delete, then answer "No" at the confirmation.	The lesson is kept. (Only if the team adds a confirmation.)	Negative	Manual	Not run yet
TC-C24	R7	Lock a whole lesson, then have the contributor delete it.	The delete is refused.	Negative	Automated	**Expected to fail**
TC-C25	R7	Lock one field of a lesson, then have the contributor delete it.	The delete is refused.	Negative	Automated	**Expected to fail**
TC-C26	R8	Contributor A adds 3 lessons and contributor B adds 2. Open A's list.	A's list shows exactly A's 3 lessons.	Positive	Automated	Not run yet
TC-C27	R8	Open the list as a contributor with no lessons.	A "no lessons" message appears and nothing crashes.	Negative	Manual	Not run yet
TC-C28	R9	Select a lesson in the list and click View.	The detail screen opens for that lesson.	Positive	Manual	Not run yet
TC-C29	R9	Click View without selecting a lesson.	A message asks the user to select one, and nothing opens.	Negative	Manual	Not run yet
TC-C30	R10	Add time and effort info (255 characters or fewer) to a lesson.	The info is saved with the lesson.	Positive	Automated	Not run yet
TC-C31	R10	Add time and effort info that is 256 characters long.	The info is rejected.	Negative	Automated	Not run yet
TC-C32	R10	Add time and effort info to a lesson that doesn't exist.	The info is rejected.	Negative	Automated	Not run yet
TC-C33	R11	Contributor B adds lessons. Open contributor A's list.	None of B's lessons appear.	Negative	Automated	Not run yet
TC-C34	R11	Contributor A asks for one of B's lessons by its ID.	Access is denied.	Negative	Automated	**Expected to fail**
TC-C35	R12	Turn effort visibility off, save, and read the lesson back.	Effort visibility is still off.	Positive	Automated	Not run yet

Test	Req.	What we do	What should happen	Type	How	Status
TC-C36	R12	Turn effort visibility off and open the lesson as the contributor.	The time and effort info is not shown.	Negative	Manual	Not run yet
TC-C37	R12	Turn effort visibility on and open the lesson as the contributor.	The time and effort info is shown.	Positive	Manual	Not run yet
TC-C38	R13	A curator changes the description, then the contributor opens the lesson.	The contributor sees the curator's new description.	Positive	Automated	Not run yet
TC-C39	R14	Ask for the list of all lessons.	Every lesson in the database is in the list.	Positive	Automated	Not run yet
TC-C40	R14	Search for a word that appears in some lessons ("database").	Only the lessons containing that word are returned.	Positive	Automated	Not run yet
TC-C41	R14	Search for a word that appears in no lesson ("zzzz").	An empty list comes back and nothing crashes.	Negative	Automated	Not run yet
TC-C42	R14	Search for "DATABASE" in capitals.	Same results as the lowercase search.	Positive	Automated	Not run yet
TC-C43	R14	Search with an empty search box.	All lessons are returned.	Positive	Automated	Not run yet
TC-C44	R14	Search for a word that only appears in a lesson's keywords.	That lesson is found.	Positive	Automated	**Expected to fail**
TC-C45	R14	Look up a lesson in the list by an ID that exists.	That lesson is returned.	Positive	Automated	Not run yet
TC-C46	R14	Look up a lesson in the list by an ID that doesn't exist.	Nothing is returned.	Negative	Automated	Not run yet

Totals: 46 tests (39 automated, 7 manual), with at least one positive and one negative test for every requirement.

Notes

- **Expected failures:** TC-C18, C24, and C25 fail because the update and delete methods do not check locks. TC-C34 fails because reading by ID does not check ownership. TC-C44 fails because search skips the keywords field. Once the code is fixed, these tests prove it.
- **Curator setup:** There is no curator screen yet, so R5, R7, R12, and R13 tests set locks and edits directly with setFieldLocked(), setIsLocked(), and updateLessonLearned() before running the contributor action.
- **R10 may change:** Time/effort is currently one 255-character text field. If experience info gets its own structure (what, how, duration, effort per member), TC-C30–C32 will need new inputs.
- **Keyword rules may change:** Keywords only have a length check right now. If the team adds the rules from the AICoaching draft (1–10 keywords, no duplicates), new tests will be added under R2.
- **Test database:** Automated tests run against a separate test database that is cleared at the start of each run, so real data is never touched.

Open Questions for Ed Discussion

- What counts as "core information" (which fields are required)?
- Does contributor delete need an "Are you sure?" confirmation like admin delete?
- Can a lesson have several experience entries, and can the contributor edit them afterward?
- In story C4, what does "content I have added after a curator has edited it" mean: the curator's edited version, or only the contributor's additions after the edit?
